

# London Borough of Sutton

**Service:**

**Sutton Education  
Business Partnership**

## **What do we do?**

We work with schools and partner organisations to help young people develop their employability skills and with their progression to education, employment and training. We are lead with organising the London Borough of Sutton Young People's Career Fair and Sutton's Apprenticeship Hub.

## **How do we work?**

We co-ordinate work placements, run programmes of work-based learning and a range of workshops to do with applications, interviews and information and advice about careers and different pathways and activity days in schools or on employers' premises.

## **How do we support schools?**

By providing the administration and support, eg health and safety visits to employers to enable work placements to proceed. We have a network of employers who we invite to be involved in the events we deliver eg. careers days and workshops

## **How do we support children and young people?**

We help them develop their awareness of the skills they will need for future employment and the careers they could consider.

## **How do we support parents?**

We provide advice and information about work placements and careers and young people's progression.

## **How is the Service Funded?**

Schools buy-back our service.
